

Product: | Fireguard reinforced shutters
Colours: | Natural Finish with Polyester Powder coats available

Tested and approved by the Loss Prevention Certification Board (LPCB), United Kingdom to BS 476: Part 22 1987. The PASIGUARD FIREGUARD fire shutter provides up to 4 hours fire protection to the maximum UK requirements. PASIGUARD FIREGUARD shutter are all custom made to suit the request of both customer and local fire officers.

Manufactured from 75mm interlocking galvanized steel lathes with steel end locks, and steel T section bottom rail. Running in rolled steel guide channels which are bolted to 75mm x 50mm x 3mm steel angles, slotted for expansion to suit M10 fixings providing secure fixing to the fabric of the building. Available in galvanized finish as standard but can be polyester powder coated to any standard RAL/BS colour. The curtain rolls neatly up into a casing, which can either be face fixed, or in certain applications hidden above bulkheads. Maximum size 7000mm x 7000mm under standard certification, larger sizes are available (subject to assessment).

In accordance with current health and safety regulations, a full range of audio/visual and safety features

Available as electric or manual operation, smooth running is guaranteed by either counterbalanced spring rollers with double guide channel and drop bar for manual operation (via fusible link) or by either single or 3 phased outboard motor with solenoid link connected to the fire alarm system (electric operation).

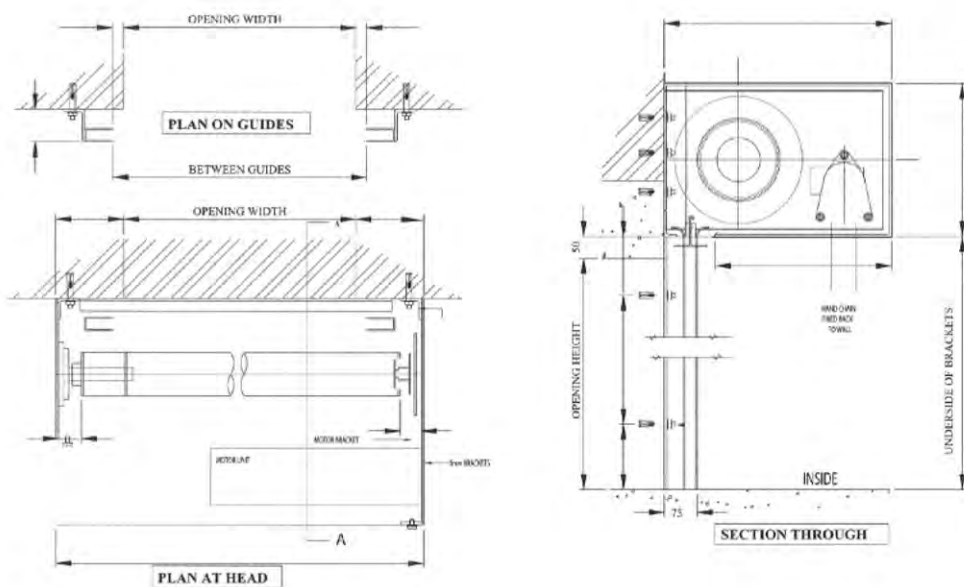

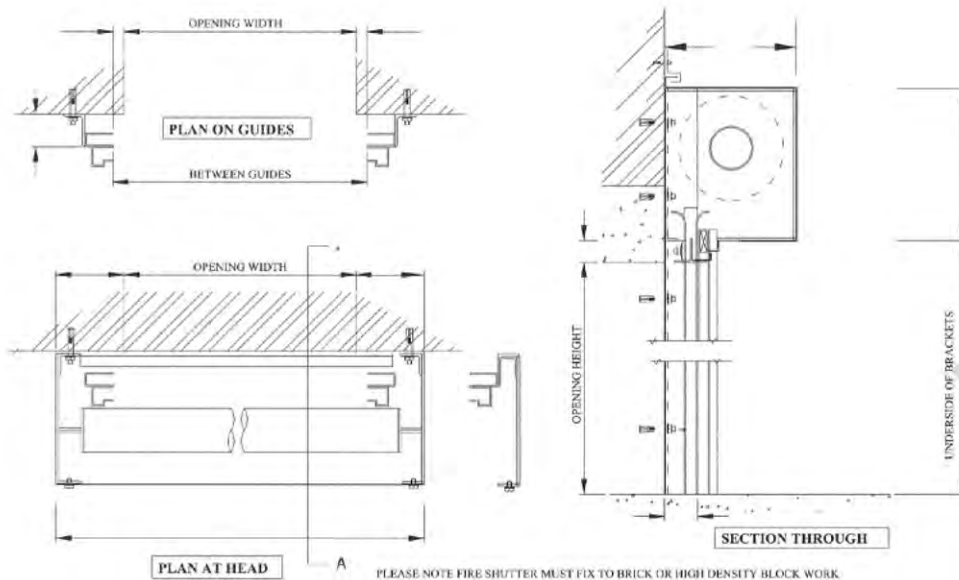

All Pasiguard installations are carried out by our trained operatives who undergo constant training to ensure that they provide as fast, efficient and trouble free fixing as possible. All new Pasiguard Roller shutter installations come with an automatic 12 month fully inclusive warranty.
