

Product: | Induguard Shutters for industrial premises
Colours: | Natural finishes with Powder coats to available

Protecting industrial premises requires a product, which is both strong and manageable during day to day operation. The practical economic solution to the problem. Every PASIGUARD INDUGUARD 75 shutter is custom made to suit the customer's individual requirements.

Manufactured from 75mm galvanized interlocking steel lathes, which are steel endlocked to prevent sideways movement. The curtain is restrained in rolled steel guide channels, which are usually welded or bolted to 3mm steel angles, providing secure fixing to the fabric of the building. Available in galvanized finish as standard but can be polyester powder coated to any standard RAL/BS colour. The curtain rolls neatly up into a casing, which can either be face fixed, or in certain applications hidden above bulkheads

Available as electric or manual operation, smooth running is guaranteed by either counterbalanced spring rollers for manual operation (max size 3000mm x 3000mm) and operated by continuous hand chain or electric operation via external 3 phase motor.

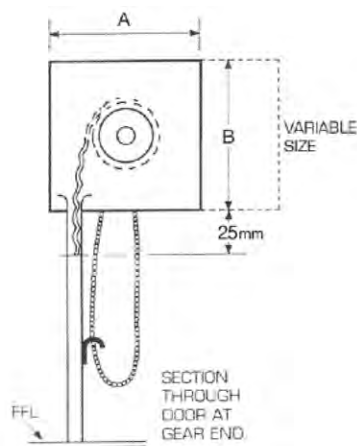

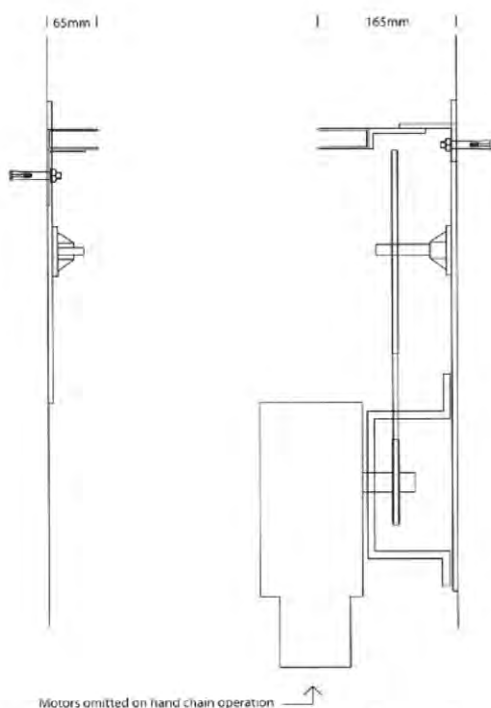

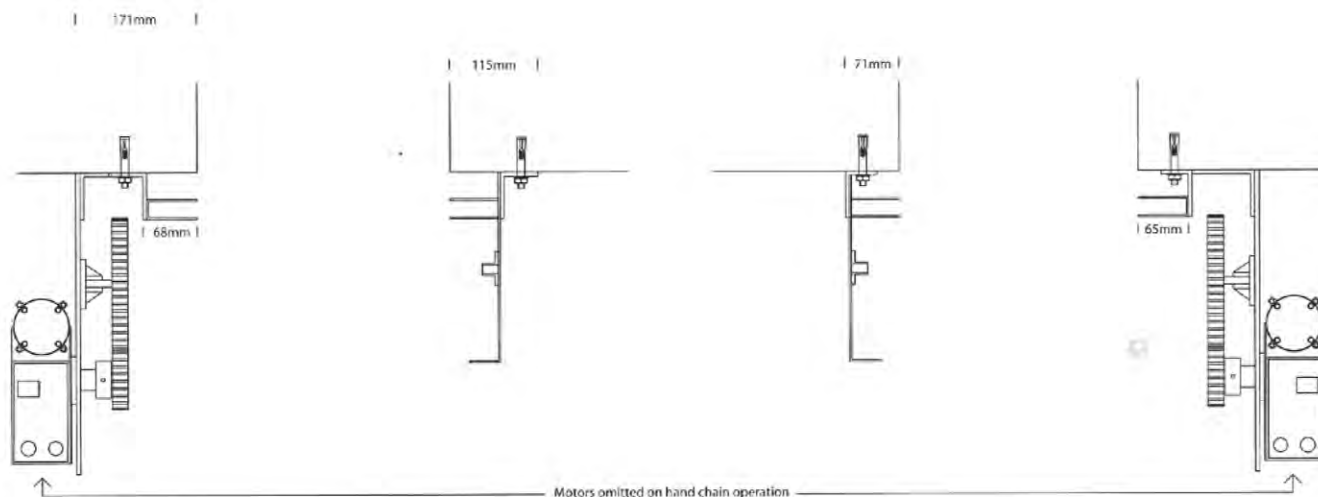

All Pasiguard installations are carried out by our trained operatives who undergo constant training to ensure that they provide as fast, efficient and trouble free fixing as possible. All new Pasiguard Roller shutter installations come with an automatic 12 month fully inclusive warranty.
