

Product: | Permanent Security Products  
Colours: | Natural Finish with Polyester Powder coats available

**A range of permanent security products especially designed to shut out and secure openings from the threat of burglary.**

### **PERMAGUARD BARS**

Insurance specified buglar bars constructed from 20mm diameter steel bars and 50mm x 10mm, mild steel flat horizontal reinforcing bars with centres not to 60mm. Standard finish Black or Red oxide

### **PERMAGUARD GRILLES**

Permanently fixed mesh grilles fitted into steel angled frames, which can be formed to allow windows to open from inside, available in both square or diamond mesh designs and available galvanised or polyester powder coat (standard RAL/BS colour)

Steel Industrial gates to provide robust yet manageable high security protection. In a range of designs using either steel box sections or steel bar in polyester powder coat finish (standard RAL/BS colour).

Pasiguard PERMAGUARD products are all custom made to suit the customer's individual requirements.

All Pasiguard installations are carried out by our trained operatives who undergo constant training to ensure that they provide as fast, efficient and trouble free fixing as possible.

Product: Permanent Security Products

Colours: Natural Finish with Polyester Powder coats available

## UltraPALE™

UltraPALE™ is a new concept in steel palisade fencing, which is born through extensive research and testing. The result is a unique double 'D' profile which is light and strong, whilst benefiting through greater handling, which effectively allows the fence to be erected per hour.

Specifiers/users can safely rely on UltraPALE's™ double 'D' profile and its patented Bolt Head Protection System (Fig. 1) which makes it unique to conventional pale. The edges of the deep double 'D' curvature are finished with a neat Dutch bead, that provides further strength and safety along the length of the pale making it ideal for use on education installations.

Every new batch of UltraPALE™ is performance tested to BS1722 Part 12 : 1999 to ensure that all fencing is supplied to the highest standard available. A certificate of conformity is available on request.

<b>ULTRA 100</b>	Standard Security	Boundary Fencing
<b>RANGE REFERENCE</b>	Performance (BS1722 Part 12 : 1999)	Recommended Usage
<b>ULTRA 200</b>	General Purpose	Schools, Campus and Industrial Sites
<b>ULTRA 300</b>	Security Purpose	Electrical/Gas Installations
<b>ULTRA 400</b>	High Security	Defence Installations

## PALING HEADS

We supply a selection of heads that can be used with our fencing systems and care should be taken to select correct head to suit the requirement needed for your project.
