

Product: Polyguard Punched Aluminium
Colours: Natural Finish with Polyester Powder coats available

When both security and vision are paramount the Polyguard 90 has all the answers, either brickbond or Inline punches provides vision, highlighting your merchandise, and polycarbonate inserts protect your shopfront. PASIGUARD 90 shutters are all custom made to suit the customer's individual requirements.

Constructed from aluminium alloy 604 BS1474 (HE9.TF) lathes which are punched for vision giving a 90mm flat faced profile with 4mm clear polycarbonate inserts (class O rated). Running in rolled steel guide channels, which are usually welded or bolted to 3mm steel angles, providing secure fixing to the fabric of the building. Available in mill finish as standard but can be polyester powder coated to any standard RAL/BS colour or anodised. The curtain rolls neatly up into a casing which can either be face fixed, or in certain applications, hidden above bulkheads or behind fascia signs.

Available as electric or manual operation (max size 3000mm x 3000mm), smooth running is guaranteed by either counterbalanced spring rollers for manual operation or by a **SOMFY** or Ellard tubular motor for electric operation.

All Pasiguard Roller installations are carried out by our trained operatives who undergo constant training to ensure that they provide as fast, efficient and trouble free fixing as possible. All new Pasiguard Roller shutter installations come with an automatic 12 month fully inclusive warranty.
