

20 YEARS of
TRUSTED SAFETY

BUILT BETTER

The only crime barrier you need.

COLLAPSIBLE SECURITY GRILLE

Collapsible Security Grilles are a cost-effective deterrent and physical barrier against attack. Unlike other security measures, such as alarms and CCTV, Pasiguard® actually prevents & deters attack before it occurs.

PROUD PRODUCT OF GHANA.
Local Response. National Support.

pasiguardTM
SINCE 1994

BUILT BETTER

HOW DO YOU KNOW IT'S BETTER?

GUARANTEE

We guarantee all of our installations for 10 years! An industry first.

LOCK

Pasiguard® has a patented 2-point lock that slams shut and locked so you can protect yourself in an emergency. Door-frame gates can be accessed from both sides with a key. Gates can be installed with either side or centre locking mechanisms, and locks can also be installed at the customer's preferred height.

WEIGHT DIFFERENCE

At 24.5kgs per m² Pasiguard® is the heaviest security grille on the market. Visit our show-room to test your strength.

COLOUR PAINT

Unlike other manufacturers we use AkzoNobel automotive paint that is both chip resistant and comes in a range of attractive colours.

FULLY FRAMED

Your gate is only as strong as its frame. A Pasiguard® grille is fully framed by a heavy duty "u" channel steel frame. Uprights have nylon wheels in the bottom track for ease of use. Tamper-proofing is a priority of the design, and our gates have proved virtually impossible to breach.

THICKER STEEL

Pasiguard® is made of high quality galvanised steel which is corrosion resistant and has solid passivated (protective coating) steel rivets, and solid steel spacers ensuring additional protection.

GALVANISED

Pasiguard® uses galvanised steel for the majority of its components. Where other manufacturers use plastic, we use steel. What does galvanised mean? The steel is hot dip treated making it 100% rust and corrosion resistant.

DISCRETION

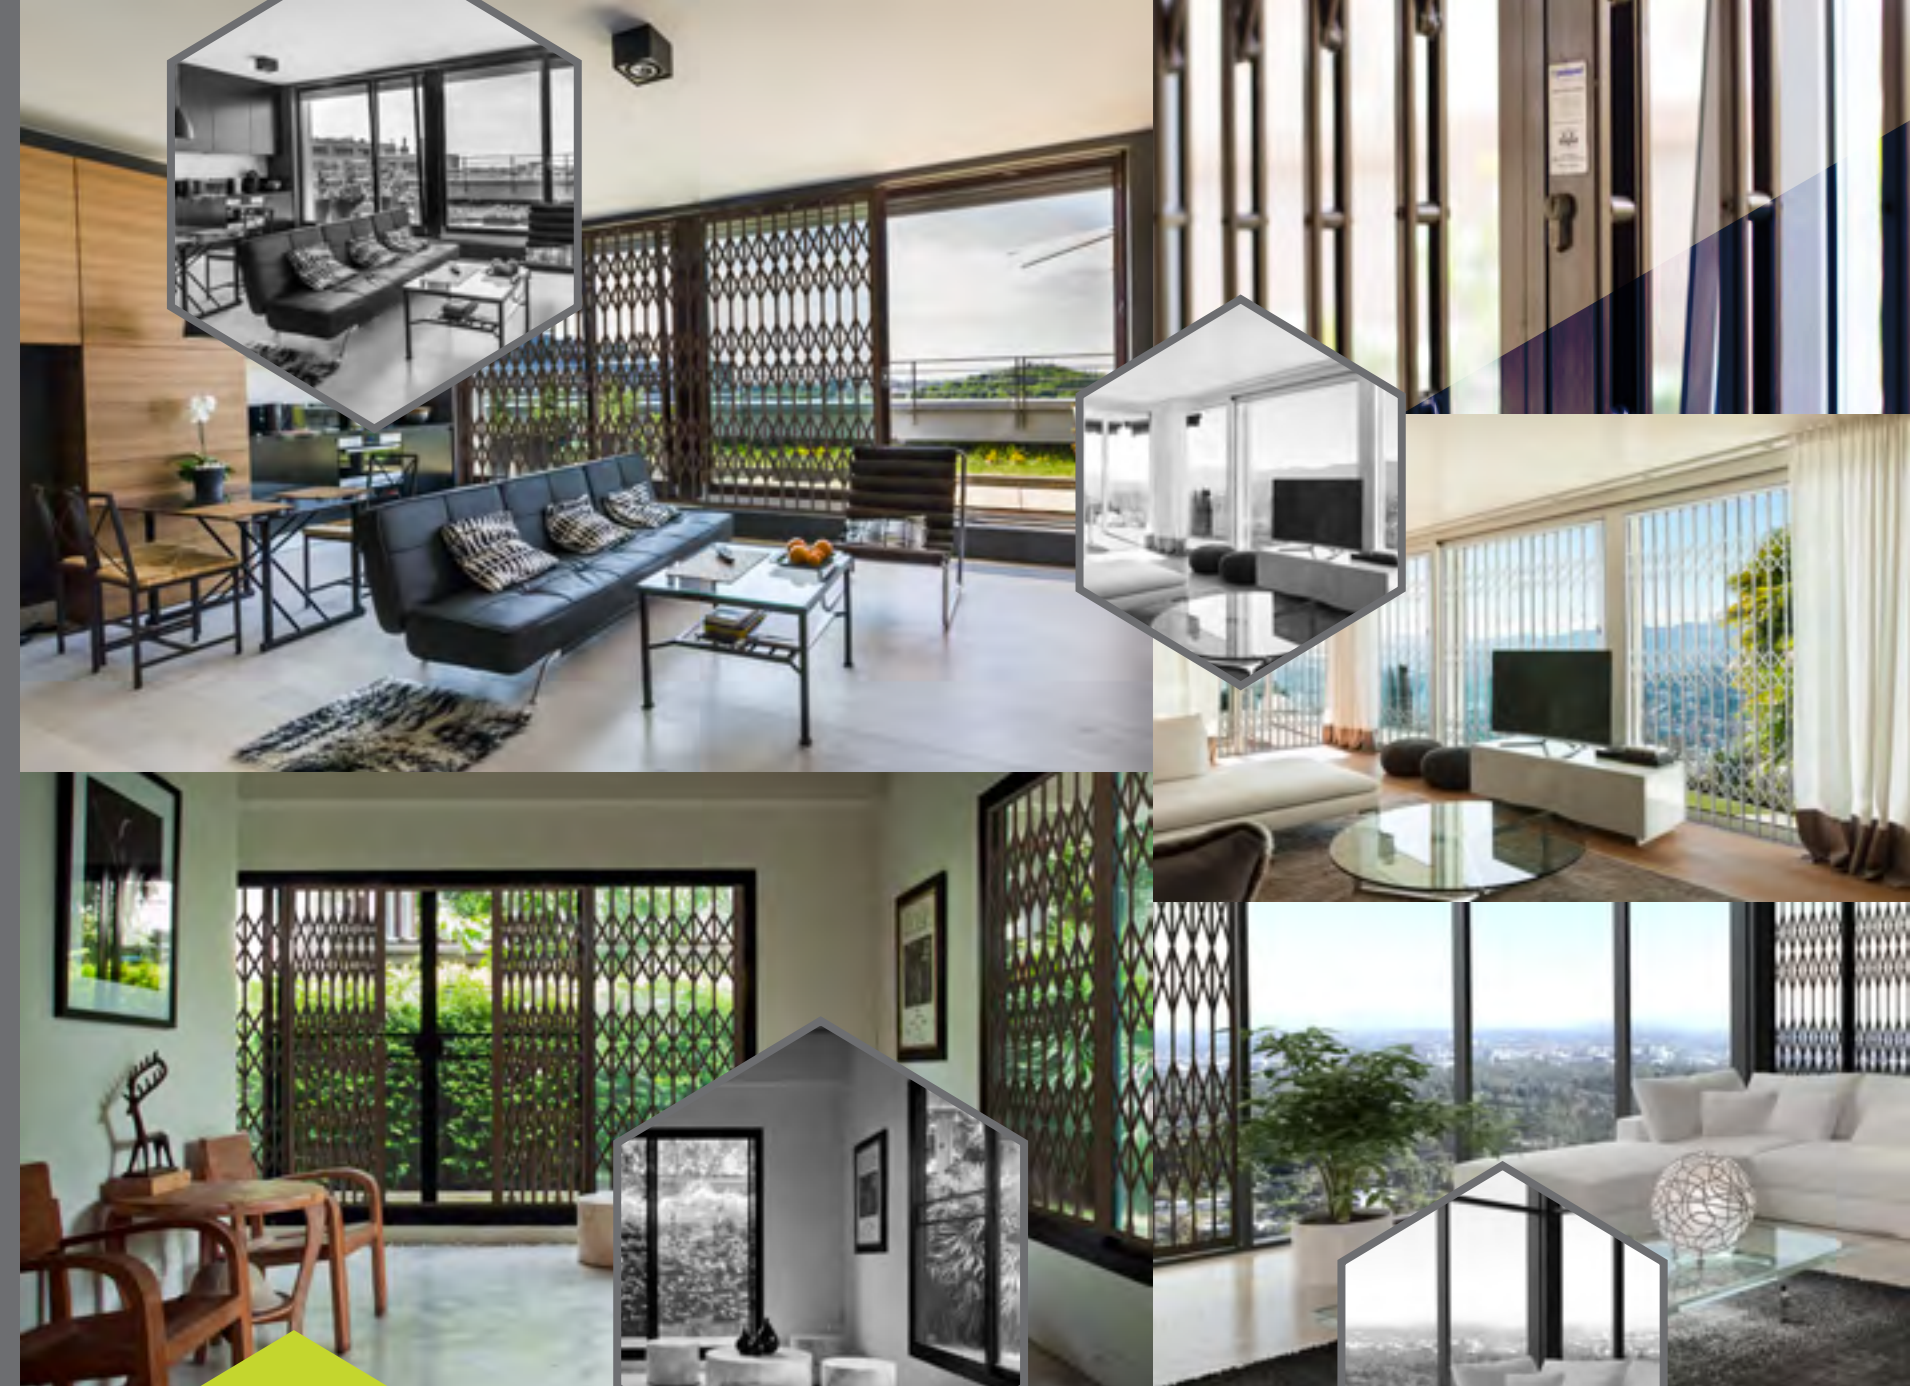

Because Pasiguard® is tailor-made for each opening, they fit perfectly. Whether fixed to the front of the opening or inside the opening, the grille stacks back to 15% of its size, and can be easily hidden behind a curtain when not in use.

PASIGUARD® IS THE TOUGHEST & HEAVIEST COLLAPSIBLE SECURITY GRILLE ON THE MARKET.

LPCB 1 or 2?

Unlike our competitors, ALL of Pasiguard®'s products are manufactured to LPCB Level 2. The UK's Loss and Prevention Certification Board is an international standard of safety and security quality. Pasiguard® is also the only collapsible grille to be certified by the Ghana Standards Board.

Clients that have made the right choice

Pasiguard® provides tough physical security to a wide range of properties.

- Banks
- Hospitals
- Shops
- Forex Bureaus
- Supermarkets
- Homes
- Embassies
- Factories
- Offices

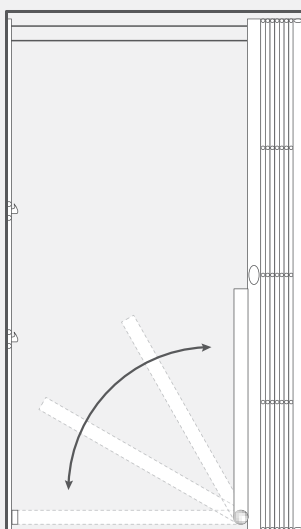

"It is perfect for my shop window and door because it can be pulled right back out of sight when the shop is open, but everyone can see I have security when the shop is closed."

- Eunice Bangwa

TAILOR-MADE in GHANA

Pasiguard® is proudly made in Ghana from galvanised steel. We tailor your grille to any dimensions you require on site at our factory in Accra, with a minimum turn-around time.

LIFT UP TRACK

The grille runs along a track which lifts and folds back when open.

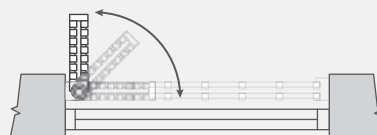

FACE FIXED

Against the opening

REVEAL FIXED

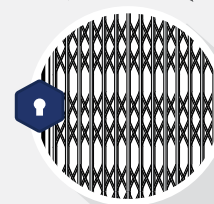

Within the opening

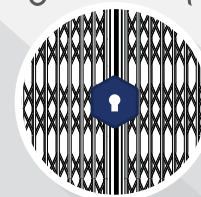

SWIVEL RETURN

When closed the stacked grilles can be swung round at a 90 degree angle out of sight

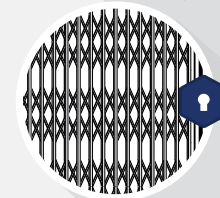

LEFT LOCK

CENTRE LOCK

RIGHT LOCK

MAKE THE RIGHT CHOICE.
